

Football Pitches Maintenance

Football is the most popular sports in Thailand. We have strong leagues and capable players which were interested by other leagues, but we don't pay much attention in the pitches

Pitches condition has so much effect to playability. The firmness, smoothness, drainage capabilities, types of grass are all factors that will determine how you should play. Can you control ball on the field or you have to play overhead only?

Football Association Thailand and Golf Course Specialists (Thailand) Co., Ltd. will hold "Football Pitches Maintenance" to share knowledge about this subjects. Speakers will included Dr. Micah Woods and Mr. Suzuki Nobuo who have long experiences and researches about the turfgrass.

Micah Woods is the chief scientist of the Asian Turfgrass Center which he established in 2006. Prior to that, he obtained his B.Sc. in horticulture from Oregon State University, was a golf course superintendent in China and Japan, and then got a Ph.D. in horticulture at Cornell University. He is the co-developer of the MLSN soil nutrient guidelines for turfgrass. Micah is also the author of two books: A Short Grammar of Greenkeeping and of Turfgrass Science and Greenkeeping. He writes about turfgrass issues at www.asianturfgrass.com.

Mr. Suzuki Nobuo he is now sport turf advisor and has been entrusted as a designated administrator for the yearly maintenance management of sports turf of Kashima Antlers F.C. Co., Ltd.in Ibaraki prefecture. He has also been inaugurated as a sports turf advisor for Sakai Municipal Soccer National Training Center (J-GREEN Sakai) in Osaka. He worked on a research regarding soil structure and sports turf (lawn for competition) which is proper to Japan's climate and natural features.

Attend "Football Pitches Maintenance Seminar" at Conferences Roon 1 Sport Science Center Building Bangkok-Thonburi University on July 25th, 2018 at 8.30-19.30. No registration Fee
